EDUCATION

California Polytechnic State University

San Luis Obispo, CA

Bachelor of Science in Computer Engineering

Sep. 2024 – May 2027

- **Relevant Coursework:** Data Structures and Algorithms, Systems Programming in C, Computer Design and Assembly, Digital Signals and Systems

TECHNICAL SKILLS

Languages: Python, C, Java, JavaScript, HTML/CSS, RISC-V Assembly, SystemVerilog, SOQL

Frameworks: FastAPI, React

Cloud/Databases: AWS ECS, AWS RDS, Azure, Supabase, PostgreSQL, Firebase, Salesforce/SFDC

Developer Tools: Git, Jira, JQL, Claude Skills, Railway, Stripe, Linux, REST APIs

AI/ML Tools: LLMs, RAG, MCP, OCR, computer vision, image processing, audio analysis

EXPERIENCE

Undergraduate Student Researcher

Apr. 2026 – Present

California Polytechnic State University

San Luis Obispo, CA

- Conducting R&D for an AI-powered victim detection system within a multi-agent search and rescue platform.
- Applying machine learning, computer vision, image processing, and audio analysis to interpret visual, thermal, and audio data for rescue operations.
- Supporting detection performance testing and evaluation to improve accuracy, operational effectiveness, and resource allocation for search teams.

Co-Founder

Nov. 2025 – Present

Almaa

San Luis Obispo, CA

- Co-founded SaaS platform for designing intervention-based programs, collecting structured data, and analyzing outcomes across organizations.
- Led product and technology strategy across architecture, feature execution, roadmap planning, and end-to-end full-stack development.

Technical Support Intern

Jun. 2026 – Sep. 2026

Cohesity

Santa Clara, CA

- Built Jira automation workflow that generates AI case summaries, escalation prevention guides, and follow-up action items after case closure using an internal LLM.
- Developed escalation prevention tooling that reduced support escalations by 50% and improved time-to-resolution by 10+ days by surfacing preventable case patterns earlier.
- Created Claude Skill for managers and directors that pulls from SFDC and Jira to score priority cases, summarize action items, and surface team workload across active cases.

Software Engineer Intern

Jul. 2025 – Aug. 2025

Kahuna Labs

San Jose, CA

- Built AI support automation software with a team, using LLM operations and NLP techniques to improve customer support case efficiency.
- Designed graph traversal logic to expand implicit and explicit references, improving retrieval quality for AI-assisted support workflows.

PROJECTS

Scindo | *Mobile Systems Design, OCR, Receipt Parsing, Expense Allocation*

Feb. 2026 – Apr. 2026

- Designed mobile-first bill-splitting platform that extracts receipt line items from images and converts them into editable shared expense objects.
- Architected OCR pipeline with normalization and post-processing to reduce manual expense entry and improve parsing of semi-structured receipt data.

repoclean | *Python, CLI, LLMs, Developer Tools*

Apr. 2026

- Built LLM-assisted CLI tool that scans codebases for obsolete or unused files using static analysis, reference scanning, and evidence-based recommendations.
- Implemented reversible quarantine workflow that preserves restore paths for 100% of flagged files, reducing cleanup risk for developer teams.
